

# Green Earth Recon instructions

## step 1

## step 2

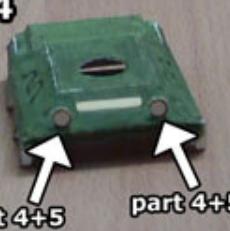

Cut out parts 1 and 2 and glue them together. Don't forget to cut the two small slits at the front of part 1, and the round hole and the large slit on part 2.

## step 3

part 3

## step 4

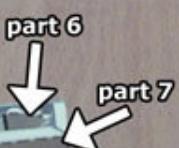

Cut out part 4, glue part 5 to the back and then glue the small tabs through the small slits on part 1.

## step 5

Next, glue part 6 into a ring ('colored' side in)...

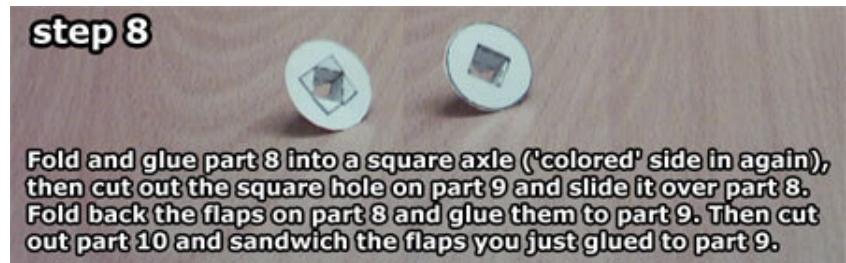

## step 6

...and glue it inside part 7, which you'll need to glue into a square box (after cutting out the hole).

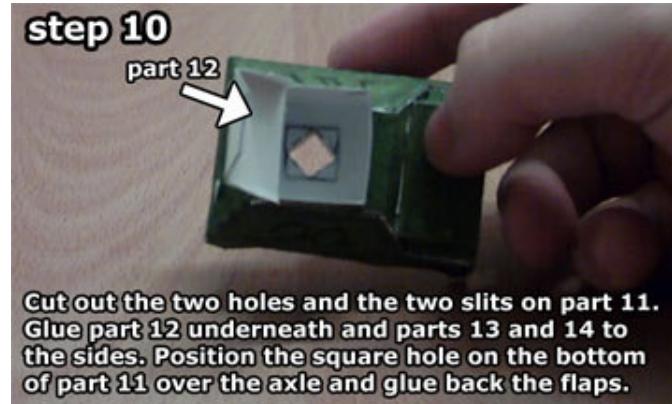

Glue this assembly underneath part 2, aligning the holes of course.

Fold and glue part 8 into a square axle ('colored' side in again), then cut out the square hole on part 9 and slide it over part 8. Fold back the flaps on part 8 and glue them to part 9. Then cut out part 10 and sandwich the flaps you just glued to part 9.

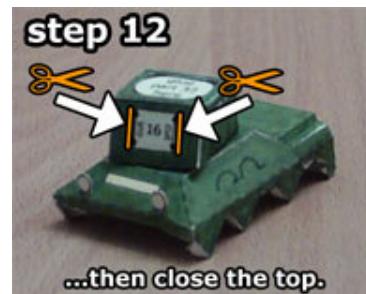

Push this axle assembly through the holes on parts 2 and 7. DON'T USE GLUE!!

Cut out the two holes and the two slits on part 11. Glue part 12 underneath and parts 13 and 14 to the sides. Position the square hole on the bottom of part 11 over the axle and glue back the flaps.

Glue part 15 inside...

...then close the top.

Glue together part 16 and push the two tabs at the sides through the slits on part 11.

Glue part 17 into a truncated cone and glue it onto part 16.

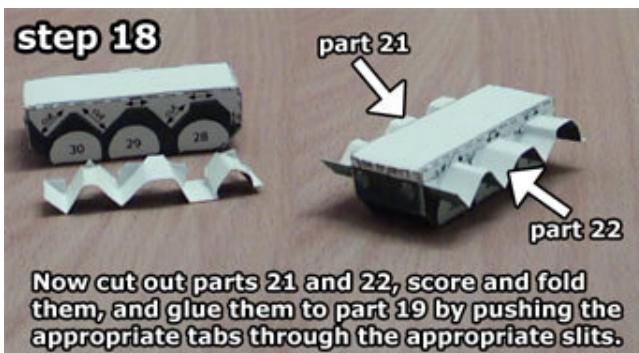

Roll up part 18 as tight as possible, and push the white part inside the truncated cone.

Before assembling part 19, be sure to cut all the slits!

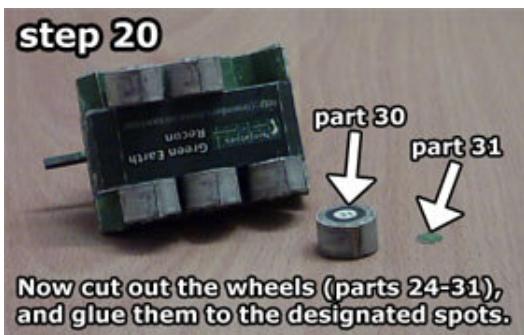

Glue on parts 20.

Now cut out parts 21 and 22, score and fold them, and glue them to part 19 by pushing the appropriate tabs through the appropriate slits.

Glue this assembly to the bottom of the main hull.

Now cut out the wheels (parts 24-31), and glue them to the designated spots.

Cut out and assemble parts 32-36.

Cut out and assemble parts 37-39...

...and glue part 39 to part 38...

...before glueing all the bodyparts together.

**Green Earth  
Recon**

Glue the GE soldier on top of the Recon and enjoy your new Advance Wars unit. Thank you for downloading and building a Ninjatoes' paper model!!
